

► CUFF HT3640h

H. Theophile's unique line of pocket door cuffs is an engineered solution integrating recessed pulls and a spring-activated pocket edge pull into a wrap-around design.

The vertically-configured HT3640 features a slight radius on its inside corners, and is shown here with a hand-hammered finish on its generous recess. It is available in a range of sizes and functions. Cuffs are made to order by project to suit door thicknesses and finishes.

HEIGHT	WIDTH	THICKNESS
8-1/2"	5-3/4"	1-3/4"
