

► LEVER HT6002 - CUFF HT3620

From H. Theophile's unique line of door cuffs, the HT3620 is an engineered wrap-around design integrating backplates, handles, and lockset, and is available in a range of sizes and functions. Cuffs are made to order by project to suit door thicknesses, bevels, and finishes.

Shown here with the HT6002 lever, the square configuration of the HT3620 cuff can be combined with a variety of handles.

HEIGHT	WIDTH	THICKNESS
